

# Commercial & Procurement Health Check

Our Health Check is a high-level assessment of the Procurement and Commercial function throughout your organisation. It will provide you with **evidence based assessments** across several areas on the current performance of Procurement through an efficient review of key documents, data and engagement with your Procurement Lead.

## What do you get from our health check?

Once we have completed the health check you will receive a short management report detailing our findings in a constructive, evidence-based format complete with a graphical dashboard. This provides you with a clear view of your current status across a number of areas. The report will also identify your **strengths**, our **concerns** and **recommended actions** which are compiled into an improvement plan. Our Director of Commercial and Procurement will then meet with your nominated individual or group to discuss the findings and provide advice on the next steps.

**“We were delighted with the results from the procurement health check report which was carried out efficiently and professionally, it was evidence based, insightful and constructive. This report will be the catalyst for procurement transformation”**

Emma Murphy - Assistant Director Business Assurance and Risk  
Thrive Homes
